Whole Number 463

"Hop Hikers" Not Popular.

A short time ago, at the Convention of Northwest Sheriffs and Police, which includes ten Northwestern States and four Western Provinces of Canada, it was unanimously agreed that motorists should be warned against the practice of giving "lifts" to pedestrians along highways, a practice which enables law-dodgers to more successfully evade capture, as was the case of the "Gorilla Man," Earle Nelson.

The question is one already seriously considered by officials of auto clubs. The Alberta Motor Association draws attention to the fact that not only does the practice of "hop hiking" militate against the apprehension of crime, but that motorists who indulge in the habit of giving auto rides to boys and girls along the roads are contributing in a very measurable degree to the creation of a new national problem.

The American Auto Association has just completed a survey which shows that 70 per cent of youthful down-outers who become a burden on charitable organisations in large cities have arrived at destitution via the "hop-hiking" trail.

One on the Jaw.

The Saturday evening attraction on Main street was a lively fistic encounter between two light heavyweights. Things were evened up for the opening rounds, but when "Cholly" got a "blawsted clip on the jaw," shaking loose a gold tooth, hostilities suddenly ceased. The referee reserved his decision.

Bylaw No. 127 Carries.

Voting took place Monday last on the proposition to sell the town's Pole line and to authorise the transfer of the power franchise to the Calgary Power Co. A fairly representative vote was cast. As predicted, the result was never in doubt, as the bylaw carried by a vote of 58 For, to 1 Against.

The Town Council will now proceed to give the bylaw its third and final reading, and pass the same. After which the usual procedure of making the transfer and sale will take place.

July First, Stony Plain's Sports Day.

We understand that interest in Stony's Sports Day horseshoe tournament is running high. Many of the local lights spent Sunday afternoon getting their arms limbered up; and it is rumored that Dan Brox has been secretly practising for some time, so that he may retain his Edmonton laurels when he comes to Stony on July 1st.

The posters for Stony's Big Sports Day on July 1st have been printed, and are now everywhere decorating the countryside. The Sports committee is working on the program for the day, and we are promised something in the sports line which will interest everyone who attends.

Edmonton Beach.

The Jac Miller cottage has been sold to A. M. McDonald, an Edmonton lawyer.

The dance hall at the Beach was comfortably filled Saturday evening. Rainbow Tiddle orchestra was on the job, and delighted patrons with their good music.

The biggest week-end in the history of Alberta is to be held here, commencing on Sat. June 20 and continuing over Sunday and Monday (Dominion Day). There is no admission charge to grounds and no entrance fees to contests. A large and varied program has been provided for each of the three days. See posters for full list of events.

Mr Barrie has just completed the playground, where swings, testers, merry-go-round, greasy rolling water-log, floating rafts and water chutes, high and low diving piers, springboard, swinging boats, all free, to make the children happy.

Automobile Accidents

The summer months of July and August undoubtedly witness the heaviest automobile traffic throughout Western Canada. It is during this period that most of the accidents carried out during a period of years. For example, one would naturally suppose that the majority of such accidents occur on bad roads, at intersections, curves, etc., but statistics prove that the majority of accidents occur on the so-called "safe" parts of the highways. Apparently drivers are careful on curves and badly surfaced roads, and let themselves go on straight, smooth stretches.

Statistics compiled in the State of Iowa in regard to accidents are certainly illuminating:

10,666 accidents occurred on straight-away stretches where the drivers of the colliding cars had a clear view of the objects with which they were colliding.

7,386 occurred at intersecting roads, most of which were due to the fact that one or both vehicles approached the intersections at speeds too great to be checked upon perceiving the approach of the second car.

3,566 were caused by failure to grant the right-of-way at street crossings.

940 occurred on curves, caused by the drivers of the two vehicles going in opposite directions "hugging" the "inside" of the bend in the road to help them maintain high speed.

1,169 resulted from driving on the wrong side of the road.

117 were caused by cutting corners.

1,788 were caused while ascending and descending hills.

The roads were in the following conditions:

15,000 roads were good; 593 were rough; 3,196 were wet; 483 were covered with snow; 1,018 were icy; 186 were sandy; 51 were muddy.

These figures seem to fairly establish the fact that the better the roads, the greater the number of accidents. In other words, where roads are not good, drivers are forced to exercise care, and because care is exercised accidents are reduced to a minimum notwithstanding that conditions existing would naturally predispose accidents; but where roads are good, drivers become careless, even reckless, and sooner or later, the inevitable result is an accident.

With the present insistent demand everywhere for more good roads, and a still higher standard of good roads, coupled with the increasing power of cars and their enormous increase in number, the accident toll on highways is mounting higher and higher. The cause is the very reverse of what might have been expected. It is not defects in car manufacture, because cars themselves are stronger than ever before. It is not road conditions which presumably might ditch a car, overturn or damage it.

No, it is the human element that is responsible for the mounting toll of accidents. Instead of reaping the benefit of the vast improvements being made, drivers are becoming more and more careless, taking ever greater chances, becoming less considerate of the other fellow's rights, determined to secure "speed" at all hazards.

"Think it over the next time you are tempted to 'step on the gas' for the sole purpose of seeing and boasting of what your car can do. It may do something you least desire and will forever regret."

Bicycles More Popular

Production of bicycles in Canada reached a new high level in 1928 at \$2,213,493. This was 52 per cent above the previous record, that of 1926, of \$1,453,658, and 85 per cent better than the \$1,194,471 reported for 1927. Three firms, all in Ontario, furnished the entire output.

When Pain Comes

What many people call indigestion is often merely excess acid in the stomach. The stomach nerves have been over-stimulated, and food rots. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians for 50 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude medicine when you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Work On Branch Line To Mine

Commence Laying Steel On Line To Sherritt-Gordon Property

Commencement has been made on the laying of steel on the branch from Cranberry Portage to Sherritt-Gordon.

According to information, a very large gang under Peter MacKenzie, started laying the rails on the 55½ mile stretch. Work will be rushed on the steel laying and it is anticipated that trains will be running into Cold Lake by September 1st.

The opening up of the Cold Lake branch will see active development on many mining properties lying between Cranberry and Cold Lake.

NERVE TORTURES

A Condition From Which Both Men and Women Suffer

Hardly any condition of ill health causes more real suffering than a shattered nervous system. And often, unfortunately, but little sympathy is shown for the sufferer, from the mistaken notion that the nerves can be controlled. Men and women with nerves out of gear often become irritable and are blamed for ill temper, when it is not their fault. Their poor health is the cause. The tired, over-busy wife and mother, whose household cares have worn her thin, the breadwinner whose anxieties have worried him until he is really ill, are among the nerve sufferers who become run-down. Their nerves like all bodily organs, need rich, red blood. In all such cases the best and simplest treatment is a course of Dr. Williams' Pink Pills, which enriches the blood and builds up the nervous system and brings good health and cheerfulness. Mrs. M. Cross, Richmond, Que., tells how this medicine cured her of all her troubles. She says: "I have suffered from nervousness and dizzy spells, and the hundred and one other things which in such a condition make life a misery. The first thing I found to help me was Dr. Williams' Pink Pills. Under the use of this medicine I found my nerves grew steadier, the dizzy spells grew less frequent, and I became brighter and more cheerful. I took the pills for some time and found that they enrich the blood, build up the nerves and are a fine medicine for both old and young."

You can get these pills through any medicine dealer or by mail at 50c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Cars For Bolsheviks

Stated That Henry Ford Will Produce 900,000 Autos For Soviets

Henry Ford is to produce 900,000 cars a year for Soviet Russia under terms of a contract signed recently and made public in New York.

The contract will run for nine years and the factory will be established in Russia. Only the Ford passenger model "A" and the Ford truck model "AA" will be manufactured. More trucks than passenger cars will be produced.

The factory is to be located at Nizhni Novgorod, on the Volga river, and will be completed within four years.

After 10 Years Of Asthma Dr. J. D. Kellogg's Asthma Remedy proved the only relief for one grateful user, and this is but one case among many. Little wonder that it has now become the one recognized remedy on the market. It has earned its fame by its never failing effectiveness. It is earning it today, as it has done for years. It is the greatest asthma specific within the reach of suffering humanity.

Better Study Geography

The Saskatoon Star-Phoenix received a letter from the assistant editor of the National Geographic Magazine, Washington, D.C., in which reference was made through out to "Saskatoon, British Columbia." If all the other information published in National Geographic is equally as accurate as the above, it is no cause for wonder that the American picture Canada only as a land of igloos and England as a country of beer mugs and plus-fours.

One of the commonest complaints of infants is worms, and the most effective application for them is Mother Graves' Worm Expeller.

It is complained that many business men write illegibly. A really busy man, of course, has not time to be constantly consulting a dictionary.

For snarls—apply Minard's Liniment.

W. N. U. 1799

New Picture Film Invented

Can Be Made Of Cloth and Is Washable

The housewife of the near future may say to her servants: "Bridget, put those photos of father in the wash and hang them on the line to dry. Be sure to iron them tomorrow, for he is coming on a visit and I want them to look nice and fresh."

Exactly that can be done with a new kind of picture film invented by Dr. R. W. Hochstetler, head of the Hochstetler laboratories.

He is not using the invention for household purposes, but instead is applying it to produce new types of sound picture films, and radio transmission of sound, photos and motion pictures. Several new processes are involved.

The first is making photographic film out of cloth, so that it is washable, ironable and non-inflammable. He says that cotton, silk, linen or even paper can be used.

Along with the new film Dr. Hochstetler announces invention of a process for reflecting sound and pictures from the face of the films, instead of transmitting light through film. He also has a different method of amplification of sound, to get further away from distortion.

Machinery For Shearing

Hand Clippers Used In Australia Only On Pedigree Sheep

Australia's wool clip this season is estimated at about 900,000 lbs. from about 100,000 sheep. The great bulk of the shearing is done by machinery, although, in the case of pedigree sheep, hand-clippers are generally used to ensure a cleaner and more even cut. Wolsley, who invented the shearing machine, went to Australia from England in the middle of last century. He took up sheep farming soon after his arrival, and brought his first patent in 1874. With the machine shears now in use, an average worker can cut 100 fleeces per day, and totals up to 200 are fairly common.

Five Points For Britain

Has Designed, Equipped and Operated Fastest Modes Of Travel

It is certainly a most remarkable fact that at this moment the fastest aircraft in the world (the seaplane which won the Schneider Cup), the fastest craft on water (Miss England), the fastest motor car (the Golden Arrow), the fastest passenger liner (the Mauretania), and the fastest locomotive (a G. W. R. Express), are British all five—British designed, equipped, and operated. We are glad that the British government's exhibit at the Toronto National Exhibition this year will show five models to remind the world of it.

For Frost Bites and Chilblains.—Chilblains come from undue exposure to lush and cold frost-bite from the icy winds of winter. In the treatment of either an excellent preparation is Dr. Thomas' Electric Oil, as it counteracts the inflammation and relieves the pain. The action of the oil is prompt and its application is extremely simple.

Mapping By Photography

The camera has been used by the Topographical Survey, Department of the Interior, as a means of gathering topographical data in the field for mapping purposes, for the last forty years.

Minard's Liniment for sick animals.

The amusing part of it, says the Farmer's Advocate, is that some of those city fellows who know how a farm ought to be run, plant a bag of potatoes and harvest a bushel.

6 Suggestions

Make Your Farm More Comfortable, More Livable and More Profitable with These Simple Spare-time Improvements

If you have any time on your hands here are six suggestions which will make an amazing difference in the attractiveness and efficiency of your farm.

First—Buy a supply of Gyproc Fireproof Wallboard. Then erect Gyproc partitions in your attic, changing the waste space into an additional room or two. Imagine how much more comfortable the family will be with the attic converted into a clean, inviting third story.

Second—Renovate the lower eaves by nailing Gyproc right over cracked and faded walls. You can decorate the flat, smooth Gyproc surfaces with Alabastine, paint or any other finish! And what a difference it will make to your home.

CANADA GYPROC AND ALABASTINE, LIMITED
Head Office: Paris, Canada
Branches: Montreal, Toronto, Windsor, Winnipeg, Vancouver

Fourth—Gyproc your poultry house. Your flock will have better health, and year-long protection from fire, cold, heat and vermin.

Fifth—Line your grain bins, barns, stables and other buildings with Gyproc. By doing so you will make them more valuable, fire-safe, cold resistant and 50 per cent more healthful for your stock to live in.

Sixth—Look about for cracked, warped or rotted walls, partitions and ceilings and repair with Gyproc. Such repairs are quick and inexpensive to make because Gyproc saves, nails and cuts so easily—saving time and labor.

GYPROC
Fireproof Wallboard

Development of Highways In the Three Prairie Provinces Presents Difficult Problems

Before the end of 1929 there will be between four and five thousand miles of permanent highway in the prairie provinces. The problems connected with road building on the prairies have not been few. In the first place, the area to be served with even the most ordinary roads, was so immense. One of the first efforts of a community is to cut out a road connecting it with town and school and during the pioneering years there is little further work done. Possibly a few logs are laid across a water hole, and some dirt thrown over. The technical name for this sort of road is "corduroy"—the reason is obvious and one's sensibilities are "touched" by the corduroy road, whether manoeuvred by lumber wagon or motor car.

But with the increase in motor cars, and the consequent increase in motor travel, there was an insistent demand for better roads, roads that would be possible in all weather. It costs time and money to be held up for several days or weeks waiting for the roads to dry, so motorists, whether on business or pleasure, bent, require all-weather roads.

Before the days of Government highways, and when all roads were under the jurisdiction of the municipal councils, some municipalities with a forward disposition made better roads than others. Some even put gravel on well graded and well drained surfaces, and so here and there would be a short stretch of permanent road. But the next municipality might have a council not interested in permanent roads, or, if so, wanted a road that ran north and south rather than one which went east and west, connecting up with the road built by the municipal "A." So these odd bits of good road helped not at all in the highway development of the province. It had to be a provincial government undertaking and a provincial "pump," and an impetus was given by the grant offered to the provinces some years ago by the Dominion Government and based on the standard of road. So an effort has been made to overcome the difficulties of roadmaking in alluvial silt in one place, to what growing mounds in another, or forest covered areas with countless rivers to cross in another, and the result will presently be a gravelled highway from Fort William to Vancouver through the southern parts of the province and a road from Winnipeg northwest to Jasper, and some day on to Prince Rupert and down to Vancouver, making a huge triangle that will tap all the cities of Western Canada.

At present there are north and south gravelled highways from Emerson to Winnipeg, and then north to Lake Winnipeg, a road from Edmonton to Calgary, south to the International Boundary, and north to Athabasca Landing, to which the Athabasca River makes a big southerly sweep before passing north again toward its ultimate goal in the Arctic Ocean. There is water finally empty after some twenty-five hundred miles of wandering through and around mountains, past miles of forests and millions of lakes of far sands which some day will provide the covering for all weather roads throughout the prairies.

Already the traffic is so heavy on some of these prairie highways that the governments are worried over the necessity of incurring further capital expenditure for asphalt roads, since it is an economic fact that when the traffic exceeds a certain number of cars a day, it is more economical to have paver roads, than

to pay the cost of upkeep on gravelled roads.

Each province has its own road policy, but in each the effort is to provide all-weather trunk highways which are of the best use to the people living within the province as well as to the tourist and also provide good market roads for those who have made their homes within that province. Each is groping for some system of conserving gravel highways, and each is hesitating over the tremendous capital expenditure of paving. But so universal is the traffic on Western Canadian roads that if some of these oil schemes do not prove themselves shortly, it will be necessary to pave. —Montreal Herald.

Not Becoming Wealthy

So Far Lindbergh's Official Position Has Netted Him Nothing

Charles A. Lindbergh is not getting rich very fast from his position as adviser on aeronautics to the Department of Commerce.

Assistant Secretary MacCracken said Lindbergh has not drawn one cent in salary since his appointment about five months ago.

He is allowed \$25 a day when his services are sought by the Commerce Department. Otherwise he gets nothing. MacCracken explained that no problem had arisen which required Lindbergh's advice.

Winnipeg Newspaper Union

SMART BLOOMER DRESS

Printed linen takes its place in the mode and is used for a most unusual bloomer dress for the growing miss of 8, 9, 10, 12 and 14 years. The back of waist extends over shirred front, forming yoke effect. The short puff sleeves are a new style feature. Collar can be made in plain or scalloped outline. The attached two-piece skirt with smartly pressed plait, allow plenty of freedom for the activities of youth. Pattern No. 821 consists of dress and bloomers. For the 8 year size, it requires 2 1/2 yards of 38-inch material with 1/2 yard of 18-inch contrasting. Printed saten, chambray, tub silk, cotton broadcloth, checked gingham, printed crepe de chine and printed cotton (found also smart). Price 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

We suggest that when you send for this pattern, you enclose 25 cents additional for a copy of our Spring Fashion Magazine. It's just a little extra for delightful styles, including smart ensembles, and cute designs for the kiddies.

How To Order Patterns

Philanthropist

W. H. Askew, wealthy Laird of Ladykirk, near Berwick, who is devoting large sums of money for the purpose of enabling worthy British to come to Canada in agricultural placement, arranged by the Department of Colonization and Development, Canadian Pacific Railway.

"Make good," said Askew to a large group of colonists whose movement he made possible, "and you will be giving me all the thanks I ask."

Trying To Develop

Hardier Strawberries

Plant Breeders Are Now Turning To Wild Variety

All the strawberries in Canada and the United States and most of the world—that is, the cultivated ones—are descendants of two wild strawberries, one a native of the Pacific Coast, and the other a native of the eastern United States.

There are many other wild strawberries, however, that did not take part in developing our present kinds. In the untamed wild one may turn some valuable trait that can be bred into our domestic varieties which may make them even more desirable than the grown ones. At any rate, plant breeders are turning to the wild sorts for improving the strawberry, especially to develop new types better adapted to such specific purposes as canning, preserving and candy making.

Would Care For Blind

The Manitoba government is anxious to have the old age pensions act extended to blind persons needing assistance. Hon. W. J. Major, attorney-general of that province, urged the extension on Hon. Peter Heenan, minister of labor. Mr. Heenan promised sympathetic consideration when in Ottawa.

Believed Fort Norman Region Offers a Great Oil Reserve Which May Be Used in Future

Educational Films

Excellent Films Supplied By the Government Should Be Shown

As for the other matter, the type of moving pictures presented to Canadian audiences, an interesting and valuable suggestion is made—namely, that the excellent films in possession of the governments—Dominion and provincial—which are at present available for exhibition in the schools, should be shown also to the general public. Whenever there is a suggestion of "educational" films, the answer is always made that the producers and theatre managers are catering to popular taste—that it is a case of supply and demand. But there is little doubt that the appetite for low-grade pictures grows by what it feeds on. The sentimental, nauseating rubbish which is served up to patrons has a vitiating effect, especially on immature minds. The suggestion made by Col. C. R. McCullough, that one of the local school authorities might be engaged for a weekly showing of these interesting government films has much merit; it should, at any rate, be possible to make suitable arrangements. —Hamilton Spectator.

Stubble Burning Warning

Extra Precautions To Be Taken Against Spread Of Fire

"Exercise care in stubble burning. Burning fires cause damage to the property of others." This is the tenor of a province-wide educational campaign which has been instituted by the Fire Commissioner of Saskatchewan in an attempt to reduce the fire losses from stubble burning which have been abnormally high during recent years.

The Prairie and Forest Fires Act requires that the stubble to be burnt must be completely surrounded by a fire-guard not less than 20 feet in width, and the fire must be guarded by three adult persons. This law, in the future, is to be more stringently enforced.

Where combines or swathers have been used and the stubble is longer than ordinarily, the Fire Commissioner warns, extra precaution should be taken.

The best way to avoid tire troubles is to ride in a friend's car.

SHORT BUT TRICKY

No. 4, Cavell—230 yards, Par 3.

This hole on the Jasper Park Lodge Golf Course, Jasper National Park, Alberta, over which the Canadian and Western Canada Amateur Championships will be played from Aug. 19-24 this summer, is more difficult than it seems. The green is well trapped and the long driver is sure to find trouble.

The fact that the Western Canada Amateur also takes place over this course at the same time as the Dominion event, assures all golfers, no matter how high their handicap, of lots of competitive play.

The photograph shows the hole from No. 1 (championship) tee, and the par is the hole in detail, with yardages to each below it.

A usual "cracking" batch of sufficient capacity to distill gasoline for the motor boats which ply the Mackenzie River during summer may be built this summer a short distance from the Arctic sea.

The Hudson's Bay Company boats which leave, McKurray and Fort Smith on their voyage down to the Arctic may carry the nucleus of this refinery. The company has investigated the feasibility of taking such a plant into the high north, and it is held probable that within the present year crude oil from Canada's highest north oil field will be supplying gasoline and other fuel for the various shipping and other operations in the north.

Just before the war the late Dr. T. O. Bosworth, well-known British geologist, visited the far north, making his way down the Mackenzie to the Arctic. He came back with news of possible oil structures near Fort Norman. Then came the war and it was not until 1919 that the Imperial Oil Limited, sent in a crew with a light drilling rig. As may be imagined, the transportation problem into this country was daunting.

On what was afterwards known as Discovery Range, fifty-three miles north of Fort Norman, the crew drilled the first well to a depth of 810 feet, at which mark they struck oil and with a gas blow. This well flowed in "heads" or spasmodically when enough pressure collected to force the oil to the surface.

Rumors floated up the river, to the south of a big oil gusher and a rush for the field was started, men making their way in even during the winter months. The well actually did increase production to about 100 barrels of high grade crude oil after being deepened.

Imperial Oil Limited, pushed its development work with enthusiasm and kept sending in new rigs and material over the 1,400 miles of wilderness between Edmonton and Fort Norman. One season they used airplanes to help them with their communications. In one season freight bills alone amounted to \$140,000.

Several dry holes were abandoned at other points along the river, but Discovery No. 1 increased production and Discovery No. 2 was drilled.

It is the opinion of many oil men that the Fort Norman region offers a great reserve of oil on which Canada may draw in the future. With mining development pushing towards the Arctic, it is not too much to predict that before many years away an means will be found to bring the Arctic petroleum to market.

Fort Norman oil is 35.6 degrees Baume gravity, with paraffin base and is extremely high in gasoline content. It remains fluid at 90 degrees below zero, having a natural temperature of 12 degrees above zero Fahrenheit.

Could Fool Resources

"Frank: 'Is it true that you are engaged to three other men besides me?'"

Francis: "Why?"

"Well, I was thinking the four of us might raise enough by clubbing together to buy you an engagement ring."

"You look very sad."

"So would you be, I dreamed that I should die in a week."

"When did you dream that?"

"A month ago."—Moustique, Charleroi.

WORLD HAPPENINGS BRIEFLY TOLD

Newfoundland's recently authorized \$6,000,000 five per cent. loan was awarded to the Bank of Montreal on a bid of 96.25. The government regarded the terms as favorable.

Prince Charles, second son of King Albert, was fined 100 francs (about \$4), for not voting in the Belgian provincial election in accordance with Belgian law.

Caught between a conveyor and a mixer in the Film Pion plant, Jacob Holt was dragged to his death. His clothing became caught in the bucket carrying device when he was working about the machine.

Some early moves looking to reduction of international naval armament are confidently expected in informed circles at Washington, to be made by the United States and Great Britain.

The Ontario Government's agreement with the Federal government on old age pensions was formally signed by Premier G. Howard Ferguson, and Hon. Peter H. Fisher, federal minister of labor. The act becomes operative November 1.

One of the largest diamonds found in the South African fields was recently brought to Kimberley from Barkley West for valuation. It weighed thirty-three and one-eighth carats and sold for \$13,500. This is believed to be a record price per carat—\$400.

Baking tests of Garnet wheat, shortly are to be carried out in the United Kingdom, and will be observed by L. H. Newman, Dominion cerealist, who leaves for Montreal, on the Montrose. Mr. Newman may also go to Hamburg and other European grain markets.

The use of Miller's Worm Powders insures healthy children so far as the ailments attributable to worms are concerned. A high mortality among children is traceable to worms. These sap the strength of infants so that they are unable to maintain the battle for life and succumb to weakness. This preparation gives promise of health and keeps it.

New Yorks Are Common
Americans may believe there is only one New York, but England has three and Scotland one. England recently claimed a New York in Kent, Lincolnshire and Northumberland counties and immediately all good Scotchmen pointed to the New York on the western shores of Loch Awe.

Use Minard's for the rub down.

Most Obedient

Mamma: "And were you a nice boy at the party?"

Bobby: "Yes mamma."

Mamma: "You didn't ask twice for anything at the table, did you?"

Bobby: "No, I didn't. I asked once, and they didn't hear me, so I just helped myself."

Cramps Diarrhoea Pains in Stomach

Mr. Roy Lighthall, Milford, Ont., writes: "I became very ill. I lost my appetite, had cramps, diarrhoea, and severe pains in my stomach."

"I purchased a bottle of

and before I had taken half of it I was completely relieved and have had no symptoms of the trouble."

"I cannot praise The Extract" too highly and will never be without a bottle of it in the house."

"It is pleasant to take and acts very quickly."

"My brother had the same experience with it as I had."

"Dr. Fowler's has been on the market for the past 34 years. You don't experiment when you buy it. Price 50 cents a bottle at all dealers; put up only by The T. Milburn Co., Ltd., Toronto, Ont."

Channel Tunnel Plan Favored

Would Help To Solve Unemployment Problem In Br. ain

Construction of a tunnel under the English Channel to connect England and France by rail is one of the schemes which Rt. Hon. J. H. Thomas has his eye on in connection with his plans to solve the British unemployment problem. Mr. Thomas has been delegated by the premier, Rt. Hon. J. Ramsay MacDonald, to direct the new Labor government's work in dealing with the unemployment situation.

He is organizing a new government department of employment and is obtaining reports on a number of projects which might supply work for some of the men now unemployed as a preliminary to calling in experts from all the government departments.

With the aid of the experts he hopes to frame definite plans for road-building, house development and railway reconstruction. At the same time he is not to forget emigration and the development of the Empire and the part they may be made to play in reducing the army of unemployed.

A Famous Field-Marshal

Viscount Allenby Has Had Distinguished Career As Soldier and Statesman

Field-Marshal Viscount Allenby celebrated his 68th birthday recently. He has displayed marked and outstanding ability in two fields—soldiering and statesmanship. At the outbreak of the Great War he assumed command of the Cavalry Division with the Expeditionary Force, and afterwards won undying fame as the conqueror of Jerusalem. Then as High Commissioner of Egypt in 1919 his firm attitude after the assassination of the Sirdar undoubtedly prevented a very ugly situation developing into positive disaster. His is a temperamental which the Orient understood and appreciated. On the Western Front he was known as "The Bull."

Phosphates For Fertilizers

Manufacture Of Fertilizers On A Large Scale To Be Carried On In B.C.

The vast deposits of phosphates in British Columbia, to be converted into fertilizer by the Copiedated Mining and Smelting Company, will save the "wheat sick" parts of the grain belt in Western Canada, said C. C. Castle, of Victoria, formerly member of the Canadian Grain Commission, the other day. "The ally," he said, "The manufacture of fertilizer on a large scale will be the greatest salvation the western provinces have ever known. It will cause an increased yield, an earlier harvest, easier sowing and bring a reduction of taxation."

For Burns and Scalds.—Dr. Thomas' Electric Oil will take the fire out of a burn or scald. It should be at hand in every kitchen so that it may be available at any time. There is no preparation required. Just apply the oil to the burn or scald and the pain will abate and in a short time cease altogether.

Products Of Canada's Farms

The four leading items in the total agricultural production of Canada in 1928, valued in all at \$1,730,304,000 are: Field crops, \$1,099,781,000, dairy products, \$250,000,000, farm animals, \$197,880,000, and poultry and eggs, \$106,654,000. Last year was the first year for poultry and eggs to exceed \$100,000,000 in value. Since 1923 these have increased in value from \$62,000,000. Value of farm animals in five years has advanced \$72,000,000.

Corn are caused by the pressure of tight boots, but no one need be troubled with them long, when a simple remedy as Holloway's Corn Remover is available.

A Large Order

Mrs. Highty-Tighty: "And these are all the vacuum cleaners you have?"

Dealer: "Yes, madam. I have shown you all we carry."

Mrs. Highty-Tighty: "Well, I'm afraid they won't suit. I want one from the Louis XV. period to match my antiques."

Keep Minard's in the Medicine chest.

BABY'S OWN
Best for Baby SOAP for the

Ambitious Project

Plan To Pipe Gas From Alberta As Far East As Winnipeg

W. S. Herron, oil operator, announces that a plan for piping gas from Alberta to Winnipeg, serving also Regina, Moose Jaw and Saskatoon, is under consideration. He says that the cost would probably be \$50,000,000 and that eastern Canadian and N.Y. capital is interested.

WHEN BABY IS WELL

MOTHER IS HAPPY

The happy mother is the one whose baby is well. It is the laughing, gurgling baby who always brings joy to the home. When baby is ill everyone in the home suffers—not only through worry over the little one but through loss of sleep—no one can find rest with a sick baby in the home. Thousands of mothers are happy mothers because they have found the way to keep their little ones well—or if sickness comes on suddenly, as it usually does with little ones, they have found the way to speedily bring the baby back to health again. Mrs. George Kech, Lindberg, Alta., is one of these mothers, and she writes as follows:—"I am the happy mother of a seventeen-month-old baby girl. Baby is healthy and strong and sleeps well at night. I give her no other medicine but Baby's Own Tablets, and she just loves them. I am never without the Tablets in the house."

Baby's Own Tablets are a mild but thorough laxative which regulate the bowels, sweeten the stomach, and thus drive out constipation and indigestion and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Offered High Position

Clarence Chamberlain, transatlantic flyer, wants a young woman secretary who will do her stenographic stuff in the air. He is willing to "iron out" the bumps and make the work as pleasant as possible. His frequent and long-distance flights, he says, necessitate the engagement of an air secretary.

SUNDAY SCHOOL LESSON

JUNE 23

PSALM OF PRAISE

Golden Text: "Bless Jehovah, O my soul."—Psalm 103.1.

Lesson: Psalm 103.1-22.

Devotional Reading: Psalm 107, 23-31.

Explanations and Comments

Gratitude and Praise For God's Mercies, verses 1-6.—"Bless Jehovah, O my soul"; thus the Psalmist addresses himself. "The Semitic languages have no word for 'self.' If the Syriac has to render a kingdom divided against itself, it says 'a kingdom divided against its soul.' If it has to render 'yourselves,' it must needs say 'your souls.' And all that is within me—my whole self, my whole being, all my faculties and powers—bless His holy name. As we have often noted, 'name' stands for person; bless Him who is holy. "It takes all there is of a man to praise and worship God adequately. Half-hearted praise is quite as much out of place as half-hearted devotion to one's family or country."

Bless Jehovah, O my soul, and forget not all His benefits. Forget none of them: take none of them for granted. If you are forgetful, because the cause of ingratitude!

"I believe thanksgiving to be a greater mark of holiness than any other part of worship."—McLeod. In the two clauses of verse 3 and the first clause of verse 4, Professor Drummond notes in the last part of each, three facts of similarity—the guilt of sin, the stain of sin, and the power of sin; and in the first part of each, three facts of salvation—forgiveness, healing, and redemption. Who forgetteth all these iniquities, thy crookedness, thy sin! Who healeth all thy diseases.

"Is not the recuperative power of nature God's own healing touch? Had He not endowed our bodies with that which restores them from accident and sickness, no bone would ever set, no wound ever close, no patient ever recover. And so it is with the deeper maladies of the soul."—W. L. Watkinson.

Nature redeemeth thy life (thyself), from destruction. Destruction, or the pit, Revised Version. "It stands for Sheol, which is here pictured as claiming the Psalmist when on the point of dying; but Jehovah paid, as it were, the ransom and so brought him back to health and life. 'Redeem' or 'ransom,' is here used figuratively."—T. W. Davies. Who crowns thee with lovingkindness and tender mercies.

"God's goodness is not like the barometer—sometimes high, sometimes low, sometimes doubtful. It is the constant quality on which we can ever rely."

Sambo: "What an dis yeah millenium that 'On don' heap folks talk in about?"

Rastus: "Yoh sho is ignorant, boy, yoh sho is. Why, a millenium an, just de same ez a centennial, only it don hab no' laigs."

"Talkie" Novels Now

People Can Enjoy Book Without Trouble Of Reading It

Talkie novels have come as the natural sequence to talkie movies.

The first talkie novel is a story "Arabian," by Andre Cayatte, and has been put up in a series of phonograph records, each record containing a chapter. The story is related by the author.

Several others are in preparation, but the plan has been changed by using men and women to recite the lines of the characters of the novel, to do away with "says she" and "says he."

Editors of the talkie novels predict a great future, principally because it will now be possible to enjoy a book without even the effort of turning every page.

"Nurse," said an amorous patient, "I'm in love with you. I don't want to get well."

"Cheer up, you won't," she assured him. "The doctor's in love with me, too, and he saw you kiss me this morning."

WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that it uses has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last few years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It does not cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs., while a square yard of glass of ordinary thickness, weighs about 120 to 125 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

MANITOBA MAY ACCEPT TERMS ON RESOURCES

Ottawa.—Terminating a political issue which has disturbed both provincial and federal politics for more than 40 years, the report of the Manitoba natural resources commission was tabled in parliament recently.

In brief, the report which consists of 46 printed pages, recommends:

(1)—The payment in each year by the Dominion to Manitoba of \$4,584,212.49, as the balance due for past arrears.

(2)—The payment to Manitoba of \$562,000 annually, from now on, until the population of the province reaches 800,000.

(3)—Increase in this annual payment of \$750,000 when the population of Manitoba reaches 800,000.

(4)—Finally, when the population attains the figure of 1,200,000, the increase in the amount payable annually to Manitoba to \$1,125,000. This amount is to remain unchanged thereafter.

(5)—The wiping out hereafter of an amount of \$183,482 which has been deducted annually from the subsidy, being the interest on the monies received by the province from the sale of swamp lands, when these lands were under provincial control, and the capital sum set as the value of the 150,000 acres of land granted as an endowment to the University of Manitoba. Hereafter, this sum will not be deducted from the subsidy.

It is understood here that both the province and the Dominion have agreed to accept the recommendations of the commission, and that legislation implementing these recommendations will be introduced in parliament early in the season of 1930.

The probable effect of the report on the natural resources question as it affects Saskatchewan and Alberta was being canvassed here by the members of parliament. In regard to the payment of the subsidies with statutory increases in perpetuity, it was considered that the report would greatly assist the other two provinces to obtain such a settlement.

May Visit U.S. In July

Premier Ramsay MacDonald To Make Goodwill Visit This Summer

London, Eng.—Premier Ramsay MacDonald will pay his contemplated visit to the United States as soon as parliament has risen at the end of July, unless an adverse reason should suddenly intervene. It was generally held in authoritative quarters here. Departure at this time would leave the premier free for his projected visit in September to the League of Nations assembly meeting at Geneva. The understanding is Premier Macdonald would represent Canada if such an Anglo-American conference is held at Washington.

"I cannot make a statement of any kind tonight," Mr. MacDonald declared as he was leaving London with his daughter, Isabel, for his home in Lonsomehouse.

The premier explained he was going to Lonsomehouse in search of rest and he expected to return again before the opening of parliament, on June 25.

Famous Wheat Men Ill

Winnipeg.—Two internationally famous wheat breeders are ill in Winnipeg while attending the Canadian Seed Convention here. They are Herman Trelo, Peace River, Alta. producer of prize winning exhibits, both in Canada and United States, and S. Larcombe, of Birtle, Man., a successful grain exhibitor. A serious breakdown was given as the cause of Mr. Trelo's illness. He is in the hospital.

Urges Muskra Farming

Ottawa.—Steps for the development of the muskrat industry were advocated in the House of Commons by M. N. Campbell (Prog. Macdonald). Muskra could be raised very easily in the vast open droppings of farm land, and government assistance by way of technical advice might be very valuable.

W. N. U. 1730

Arrange Direct Express Service From Europe

New Agreement Will Ensure Quick Despatch of Parcels

Montreal, Que.—Arrangements have been completed between the "Compagnie Internationale Des Wagons-Lits et des Grands Express Europeens" and the Canadian Pacific Express Company for a direct express service from all European countries to Canada according to information received at Canadian Pacific express offices.

Parcels handed in at any of the offices of the Compagnie Internationale throughout Europe will be forwarded direct by the famous crack trains of that company to points where the Canadian Pacific Express maintain receiving offices, whence they will come to this country on Canadian Pacific steamers.

Sending parcels to Canada has always been a somewhat hazardous business, at any rate from remote points in Europe where no adequate local express service is in operation. By virtue of the new agreement entered into by the two companies it will now be as safe and quick as sending a parcel from one's Canadian city to another.

Will Collect Oil Royalties

Government Will Put Regulation Into Effect Next January

Ottawa.—The regulation, enabling the government to collect royalties on oil produced on Dominion Crown lands leased to private companies will be put into effect on January 1, Hon. Charles Stewart, minister of the interior, told the House in committee. The regulation, which was passed some years ago, but has never been put into effect, provides that after a company has been producing oil for five years, a royalty not less than 2½ per cent, and not exceeding five per cent, of the output, or five per cent, of the sales of the product of the locality at the discretion of the minister shall be collected.

New Grain Board

A Board Composed Of Younger Men To Be Appointed Soon

Ottawa.—The cabinet is now considering the appointment of a new board of grain commissioners. The members of the old board, it is understood, are to be retired, and a board composed of younger men is to take their places.

The only appointment seriously considered so far is that of a successor to Leslie Boyd, the chairman of the board, and, undoubtedly, this position will be offered to Mr. Justice Turgeon, of Saskatchewan. It has been stated here, however, that he will decline to accept. In this event, it is not improbable that the post will be offered to Hon. Charles Stewart, minister of the interior.

Suggests Earlier Sessions

Ottawa.—A suggestion that is future parliamentary sessions should open in November and conclude on or about the first day of May, was made in the House of Commons by William Irvine, U.F.A., Wetaskiwin. Mr. Irvine expressed the opinion that the present practice of meeting parliament in February and continuing the session until well on in the summer months was an injustice to the western members and to those from the maritime provinces.

Dirigible Goes On Strike

London, Eng.—Completion of the new British dirigible R-100 on schedule appeared impossible because of the failure to settle a strike of about 30 workmen. Officials at the Howden Airship Works said the strikers insisted that the dispute be settled through direct negotiations with the U.S.A. The R-100 will be one of the largest airships in the world. It was to undergo tests next month.

Newspaper Man Promoted

Calgary, Alta.—W. J. Watson, who has been secretary-treasurer and also a director of the Calgary Herald since it passed into the present ownership in 1908, is leaving Calgary at the end of the month to take the position of assistant to the president of the Southern Publishing Company at the head office in Montreal.

IN BRACKEN CABINET

Hon. W. R. Clubb, who resigned from Bracken cabinet, Manitoba, during Brown Sisters probe, has been reappointed minister of public works.

Sends Farewell Message

Stanley Baldwin and Premier King Exchange Greetings

Ottawa.—A farewell message which former Premier Stanley Baldwin sent to Premier Macdonald King, on the day of Mr. Baldwin's resignation, and Mr. King's reply, were made public here. It was explained that publication of the telegrams was delayed until the prime minister's office has ascertained definitely that Mr. Baldwin's message was not intended as a purely personal communication.

Mr. Baldwin, under date of June 4th, cabled: "I have today tendered my resignation to the King. On leaving office I should like to send you a message of farewell and sincere good wishes. It has been a great privilege to work in collaboration with you, and I wish to express my warmest thanks for your helpful co-operation during the last four and a half years, in all matters of common concern."

Mr. King replied: "Your telegram, June 4th, May I express my deep appreciation of your message of farewell and good wishes. Throughout your tenure of office the most cordial relations have been maintained between His Majesty's governments in the United Kingdom and in Canada. It will always remain a source of deep gratification that I have been privileged to be associated with you in the many important matters of common interest that have marked these years."

King Resumes Few Duties

Is Now Able To Look After Part Of Work

London, Eng.—King George is now sufficiently well to resume many of the functions delegated by him to a council of state, but will not yet assume his full duties.

Among the duties which His Majesty will now transact will be all business connected with dominion affairs. But it was presented to His Majesty that, for the better preservation of his health, he should not for the time being resume all functions he had delegated.

Eighteen "Count 'em", in One Family

The Clan MacLennan arrived in Canada recently by the Canadian Pacific liner, "Metagama", at least if it wasn't the whole clan, it seemed like a large proportion. Donald, his brother Kenneth, and his son Allan were leaders of the family groups under Donald's command. Including grandchildren the party, which is banded in bloc for Centreville, Ont., numbered twenty-four ranging in age from forty-five years to six months. They had twenty-one pieces of baggage weighing 3,000 pounds.

Attacks Lloyd George

Former Chief Whip Of Liberal Party Criticizes Methods Of Leader

London, Eng.—A lively attack on Rt. Hon. David Lloyd George, Liberal leader, is made in a letter to The Times by Vivian Phillips, former chief whip of the Liberal party. He says many Liberal candidates with whom he has talked since the election are of the opinion that Mr. Lloyd George is not an asset but a positive liability to the Liberal party.

"Only courage will save the party now," he writes. "Courage to turn back on the shame and pretences of the past two years and make a new beginning under new leadership which will inspire public confidence and trust."

"If it will break loose from the degrading bondage of the party funds, if it will follow character rather than cleverness, if it will set honor and principle once again in the place which they have held in the days of its former greatness, it may yet be preserved to wield its old moral authority in the state and be an instrument of beneficent service to this nation and the world."

Sapiro To Visit West

Will Conduct Speaking Tour In Saskatchewan This Month

Saskatoon, Sask.—In the interests of the Wheat Pool and under the auspices of the United Farmers of Canada, Saskatchewan section, Aaron Sapiro will conduct a speaking tour of Saskatchewan during the latter part of June.

Mr. Sapiro will reach here on June 26 from the east and speak here that evening. June 27 he will speak at Weyburn. The date for his visit to Moose Jaw is not definitely set yet, but will be either June 28 or July 2. If he does not speak in Moose Jaw on June 28, he will probably visit Regina on that day. On June 29 he will be at Swift Current, and July 1 at Kerrobert.

Bisley Team Sails

Members From Canada Have Left For Southampton

Montreal, Canada, 1930. Bisley team was given an enthusiastic send-off on board the Canadian Pacific liner "Montrose" on which the team has commenced its voyage to Southampton.

Members of the team include Captain W. C. Colquhoun, Esquimalt, B.C.; Sgt. J. H. Regan, Victoria; Lieut. D. Fyvie, Canadian Scottish; Lieut.-Col. R. M. Blair, Vancouver; Master Gunner S. Collier, Esquimalt.

Lieut. Desmond Burke, Ottawa, a former winner of the King's Prize, will join the team in England.

No Increase For Judges

Ottawa.—Having learned that parliament would not support an increase in judges' salaries, he did not think it desirable to attempt to force such a measure through, declared Hon. Ernest Lapointe, minister of justice, in the House of Commons. When the time came, and parliament was in a mood to endorse such an increase, he would make no delay, the minister said.

ROYAL GRAIN COMMISSION TO CARRY ON WORK

Lethbridge.—The immediate program of the Saskatchewan Royal Grain Commission will not be affected in any way by the political crisis in Saskatchewan, and even should the government of Premier James G. Gardiner, which appointed the commissioners, resign within the next week or two, no anticipation of curtailment of the inquiry is feared.

This was the belief made known by Chief Justice Brown, commission chairman, while the body held sessions in Lethbridge.

The inquiry for Alberta will be concluded with a session at Medicine Hat. The commissioners then expect to enjoy a week's vacation before visiting four or five rural points in Saskatchewan, holding a brief session in Winnipeg and a two-week session at Port Arthur and Port William. If any charges of fraud are made they will be announced by whatever government is in power in Saskatchewan, Chief Justice Brown stated.

"Complaints of car distribution, shortages of cars during the rush season, and leakage were lodged before the commission. John Maynard, superintendent of the Ellison Milling Company here, recommended placing an inspector at each railway division point to check car leakage."

Found Guilty Of Murder

Woman And Male Accused In Quebec Sentenced To Be Hanged

Hull, Que.—Philbert Lefebvre, and Mrs. Mary Viau Montpelier, Que., were found guilty at the Hull assizes of the murder of the woman's husband, Zephyr Viau, by poisoning, and were sentenced by Mr. Justice L. J. Loranger, to be hanged on Friday, August 23, at the Hull jail. The jury was out only 25 minutes.

On charges of murder, lasted over an hour, Judge Loranger described the poisoning as one of the most despicable of crimes. There was no doubt, he said, that the murder had been planned for months.

The confession of the accused showed that Lefebvre had helped Mrs. Viau with strychnine knowing for what purpose she would use it. Zephyr Viau had been very poor and every winter went away to work in a shanty. During his absence Lefebvre had visited the shack on several occasions.

When asked if they had anything to say why the sentence of death should not be passed upon them, both prisoners muttered, "I am innocent and I ask for clemency."

Minorities Trust Canada

Dominion Will Reap Harvest Of Goodwill Says Hon. Philippe Roy

Victoria.—"Those masses of population are already looking to Canada as a strong advocate and a stout protector of their interests," Hon. Philippe Roy, Canadian minister to France, said in an interview here regarding the minority populations of Europe whose problems are now being considered by a special committee of the League of Nations.

"It must not be forgotten by Canadians," Mr. Roy said, "that there are 40,000,000 souls living in those European minorities. It is going to be a wonderful thing in a few years when Canada reaps the harvest of goodwill which has been sown by the announcement of Premier Macdonald's King, aligning Canada in support of the interests of the minority peoples."

Turning to reparations, Mr. Roy said the recent settlement of the war indemnities in Europe was the greatest forward step achieved by the nations since the armistice.

B.C. Mineralogist Dead

Victoria.—William Fleet Robertson, for twenty-three years provincial mineralogist, died recently. Mr. Robertson was born in Montreal, 1850, and was widely known in the western American mining world. He retired in 1925.

Here and There

(320)

More than 1000 employees will comprise the personnel of the Royal York Hotel when the Empire's greatest hospitality this open-house is thrown to the public in June. The chef has between 125 and 175 skilled culinary experts under his control and the headwaiter commands a group of over 300 workers. There is a corps of 28 picked telephone operators and there is a printing establishment with three presses and a linotype machine.

With a score of 1405 out of a possible 1500, highest ever made since the contest was inaugurated, Canadian Pacific Railway police, Ontario No. 1 team have been awarded the Dominion Revolver championship for the Chief Constables Association Trophy. Thirty-six teams competed for the title. The winning team was made up of Investigator E. O'Brien, Sudbury; Constables H. H. Gyras, Port McNicoll; J. H. B. MacDonald, Toronto; D. Pradergast, Sudbury; and W. R. Tinsman, White River, Ont.

Addressing the Quebec branch, Canadian Manufacturers Association at Montreal in its annual meeting recently, Henri Rolland, retiring chairman, said Canada had the second largest per capita installation of water power in the world with its 513,000 h.p. per thousand of the population. Second only to Norway. Today \$300,000,000 or \$100 for every person is invested in hydro-power plants and there will shortly be over \$200,000,000 added by numerous undertakings now in their initial stage.

Fine progress is being made in seedling in the Prairie Provinces, according to reports to the agricultural department of the Canadian Pacific Railway at Winnipeg. Last time due to backward weather is now made up, it is claimed, the soil being in excellent condition. Pastures are somewhat backward but stock are in good shape.

Under its policy of development and expansion the Canadian Pacific Railway has already this season let contracts for 236 miles of branch line construction in western Canada, according to D. C. Coleman, vice-president in western lines. It is expected that when contracts for the Laidlaw-Prinns-Albert branch are let construction programmes for 1929 will call for slightly more than 400 miles.

Hon. Narcisse Perreault, former Lieutenant-Governor of the Province of Quebec, returned from a six months trip to India and the East recently. His Honor was taken ill with bronchial pneumonia when in Penang and for a time his condition was very serious. When he returned to the Trans-Canada Limited at Montreal from Vancouver he was however looking well and stated that but for his illness had thoroughly enjoyed his holiday. It was his first visit to India and he was much impressed by the scenes witnessed there.

The Desert Song

—BY—

VIRGINIA MORRIS

Copyright 1929 Warner Bros. Pictures, Inc.

"The Desert Song" is a Warner Bros. production of this novel. It is based upon the story by Frank Mandel, Laurence Schwab, Oscar Blumenthal, 2nd, and Frank Mandel.

CHAPTER V.—Continued.

An hour later the Red Shadow received from his host the advice that the French girl was alone in the upper chamber. He found this room to be a gorgeous apartment lighted by great oriental lamps that burned live coals and suffused a weird effect. Margot was sitting on a low silk couch. Her dusty riding habit had been exchanged for a flimsy chiffon skirt that revealed every line of her alluring body. A narrow pearl bodice took the place of a waist and her bare arms were bridged with broad bands of precious stones. She was far more beautiful in eastern garb than the Red Shadow had ever seen her before.

"Why did you bring me here?" was Margot's first question when the Red Shadow entered. She arose from the couch and stood in a defiant attitude.

"Why?" he replied. "To teach you to love me—so fiercely that you could give up home and friends. Call it a mad dream, but mad as it is I'm willing to risk my whole future to make it come true!"

"Leave love out of it," she answered. "I hate you! I love Paul!"

But the Red Shadow knew better. With a final positiveness, he told her, "You do not—love him! Come to me!"

His persuasiveness had not won her, for she shrank from him. "Tell me one good reason why you will not," he insisted.

"Why there . . . there are many!"

"Give me one!"

"Why I love . . . I love Pierre Birabeau. I know that I do. Once I dreamed of romance and adventure, but I've had enough of it. I want the quiet life that Pierre planned for me!"

The Red Shadow made an impulse.

"HELPED ME WONDERFULLY"

Woman Strengthened by Taking Lydia E. Pinkham's Vegetable Compound

Port Colborne, Ont.—"After having an operation, I was very miserable, weak, nervous and very near unfit to work. I saw Lydia E. Pinkham's Vegetable Compound advertised and tried it and wonderfully I have now back again. My nerves are much better. I feel safe in saying Lydia E. Pinkham's medicine has helped me wonderfully."—Mrs. Wm. H. BISHOP, Box 148, Port Colborne, Ont.

W. N. U. 1790

though she felt herself madly infatuated with the outlaw, she believed that sincerity had prompted her to tell him she longed for the safety that life with Pierre would mean. Her heart was a mine of contradictions but, after all, nothing could matter much now.

She did not hear Captain Paul Fontaine enter. He startled her when he sat on the arm of her chair and tried to take her hand.

"Please, don't, Paul," she protested wearily.

Fontaine's face flushed with jealousy. "I know why you're not happy. It's because the Red Shadow is in danger. You've fallen in love with him."

"Margot turned her head and looked at him defiantly. "What if I have?"

The quarrel was interrupted by the arrival of General Birabeau. "Paul, the command to take the Red Shadow a prisoner is changed. He is not to be brought in alive!"

Fontaine smiled but Margot jumped to her feet and exclaimed, "But the man you're after is alone and unarmed! You cannot be cowards enough to kill him!"

"Go, Paul, you have heard my orders!" insisted the General. But he was not devoid of sympathy for the girl, for as his subordinate left, he turned to her. "Margot, I advise you to give up this dream of romance. It has caused you enough heartache."

"Thinking it was kinder to leave her alone, he disappeared silently to the guard. The girl resumed her vigil, scanning the desert spaces she knew not for what. Afternoon darkened to dusk and dusk darkened to evening. Then, out of the stillness, cries of the returning soldiers were heard. A moment later Captain Fontaine burst into the room and the instant that Margot saw his face she knew that his mission had been successful. He was followed by General Birabeau, who asked, "Tell me what happened?"

"We killed him!"

"Who? Which one of the soldiers?" the commandant enquired.

Paul Fontaine hesitated. "None of our soldiers. But the last man you would ever suspect."

The door opened and Pierre Birabeau stood before them. Over his arm was the cloak and the mask of the Red Shadow and his hand held the outlaw's broken sword. Gradually his father realized the daring of the son he had almost despised. It was he who had killed the dreaded enemy. In a rush of emotion he put his arms around the boy and held him close. Then another realization slowly possessed him, for he whispered so that only Pierre could hear, "You were bravest when you refused to fight!"

That evening Pierre Birabeau was the acknowledged hero of the post. Margot alone failed to congratulate him. The General, bursting with pride at the bravery of his own boy, urged him to tell the girl the details of his amazing exploit. As he left the room he saw Pierre put his arm around Margot Bovalet—and he had never dared that before!

"Margot—" Pierre began.

"Please, Pierre—don't tell me anything more. I—I want to be left alone."

"But answer just one question, Margot, and then I will go. Did you love this man very much?"

There were tears in the girl's eyes. "Yes, I loved him—as I never will love anyone else."

Pierre did as he had promised. He went quietly from the room. When she knew that she was alone Margot gave way to all the despair that had been stifling her since the night before, since she started back over the desert, leaving the Red Shadow to face the horrible punishment he could not escape. Her own sobs prevented her hearing the door through which Pierre went open again.

She felt a hand on her shoulder. At first it seemed impossible—it was the distorted imagining of her broken heart. But when she felt his lips against hers she knew that it was true. The Red Shadow—her lover—was there, dressed in his scarlet burnoose, his face hidden by the mask he had always worn.

Then, after that long embrace, she lifted the mask. And she knew that the greatest romance of all was ahead—the tempestuous love of the Red Shadow and the protecting tenderness of Pierre.

THE END

Interesting Relics Found

Discovery Made At Old Settlements

On Saskatchewan River

A discovery of great prehistoric interest has been made at Brouseau, an old settlement on the north bank of the Saskatchewan River, near Spaldon, the discovery consisting of a large quantity of articles of warfare and household use.

A short time ago, as John Ames was plowing on his farm at Brouseau, the sound of steel against steel attracted his attention. On investigating he discovered a barrel shaped cavity filled with axes of many patterns, tomahawks, big hunting knives, table knives and forks, flints, arrowheads, locks, keys, etc.

The locks are of the type known as stock locks, and these and the keys are of enormous size compared with the modern kind. Many theories are afloat as to the reason for burying these articles in this remote place. Many years, perhaps generations, must have elapsed since this miscellaneous collection of articles were hidden away. That they were enclosed in a barrel is quite evident from the shape of the hole and from the fact that though the wooden staves have long since turned into dust, some of the iron hoops, rusted and worn, still remain. A few theories in connection with this remarkable find are: That the articles were being conveyed to a Hudson Bay post when owing to some accident or disaster, the factor or men in charge of them had to cache them in this spot; or that they may have been taken from the post at Frog Lake, at the time of what is called the Massacre, by Indians, who fearing pursuit, buried them where they were found.

Firestone TIRES

FIRESTONE Tires are the outstanding choice of those who demand the greatest safety for high speeds, rugged endurance and utmost economy. Gum-Dipping, the extra Firestone process, combined with the Firestone Safety Thread, makes these tires the toughest, longest-wearing tires on earth.

Made in Hamilton, Canada, by Firestone Tire & Rubber Co. of Canada, Limited

Little Helps For This Week

"He giveth power to the faint, and to them that have no might He increaseth strength."—Isaiah xl. 29.

It is not, Lord, that I have fearful

grown.

To walk the way I must;

But on the path is steep that I must tread,

And often in the dust.

I fall, my feet are bleeding from the stones.

And all my tears are vain;

Forgive, I pray, dear Lord, and give me strength to rise again.

Whether we stumble, or whether we fall, we must only think of rising again and going on in our course.

God never makes us feel our weakness, but that we may be led to seek strength from Him.—Fenelon.

It is impossible for that man to despair who remembers that his Helper is omnipotent.—Jeremy Taylor.

Mathematical Genius

Six Year Old Danish Boy Has Dismounted Scientists

Danish scientists have been dumfounded by the mental antics of a six-year-old mathematical genius.

Paul Larsen, whose father is a modest tailor in the village of Hvidovre. On a recent visit to Copenhagen the clubby little fellow multiplied figures with products as high as 10,000.

Most of his answers were given in less than ten seconds, and if the calculations of his inquirers may be relied upon, all of them were accurate.

According to his proud father, Paul has displayed his ability at arithmetic since he passed his fourth birthday, and no one has ever taken particular pains to train his mind in that direction. When he is not performing for curious visitors, the child spends his time playing about the streets of his native village.

So Many Home Uses!

YOU'LL FIND A hundred vital, saving uses for Para-Sani Heavy Waxed Paper in your home. Comes in handy, sanitary, knife-edged packages. For less cost, better quality, than any other waxed paper. At grocers, druggists, stationers.

Keep foods fresh, longer by covering them with Para-Sani.

Use Para-Sani to keep kids' lunch tins fresh.

Keep the freshness in sandwiches prepared for the party with a covering of Para-Sani.

IT PAYS TO PAY CASH.

Officer Moses had as a week end visitor his brother Leonard, from Edson. He had been employed in the Liquor Vendor's store at that point; and has now been promoted to take charge of the Government store at Coleman.

The Misses E. Oatway, E. Malloch and O. Moses were in attendance, Saturday, at the T.C.M. exams in Edmonton—two for harmony and one for theory.

Mr. Adamson, manager of the Rainbow Toddle Orchestra, has written The Sun, stating that his orchestra will not supply the music at Holborn Hall on June 28, as his organization has an engagement that evening at Gibbons' Sid-ing.

Mr. Rae is holding a sale at the local livery barn, on Sat., June 22, of 2 geldings, 2 cows and 1 calf.

Hennig—Ulmer.

The wedding took place at St. Matthew's church (Missouri Synod, Tuesday, June 15, of Miss Terese Ulmer (daughter of Mr. and Mrs. Jacob Ulmer) to Mr. John Hennig (son of Mr. and Mrs. Henry Hennig). Rev. E. Eberhardt, pastor of the church, performed the ceremony. A large number of friends of the contracting parties were present at the ceremony.

Death of Mrs. Jay.

The late Mrs. R. E. Jay, whose funeral took place on the 9th inst., leaves to mourn her loss, her husband, three children—John Ernest, Ethel May, and an infant daughter. Rev. F. W. Benke, minister of the Baptist church, officiated at the funeral services.

Mr. Jay wishes to extend a vote of thanks to all friends and neighbors who have so kindly helped him and stood by him and his children in his bereavement.

Church Services

At the Lutheran service in English on Sunday evening, in Stony Plain, Pastor Osterman delivered an instructive address on the old yet ever new subject of the parable of the Return of the Prodigal Son, from the Gospel of St. Luke, chapter 15th. There was a good attendance of worshippers. At the next English service, Sunday, July 7, a Divinity student, from Concordia Seminary, St. Louis, Mr. Philip Unterschuetz, will preach the sermon.

Service at United church Sunday evening at 7:30; Rev. G. A. Sauder.

R. C. services will be held in the Town Hall on Sunday next at 9 a.m.

NOTICE-1

JUNE—
28—Three act Comedy by Warden Doo-Dads.
29—Big Week—End Attractions start today at Edmonton Beach.
JULY 1—Sports Day at Stony Plain.
4—Town Council meets.
6—Sale of Stony Plain lands for arrears of taxes.

Duffield's Annual Picnic

Duffield Athletic Club's annual picnic was held Saturday last. The exceptionally fine day and large crowd both helped to make it a success in every way. The keen competition for the Faulks Challenge Cup between the 6 schools represented kept everyone on their toes all day. The Cup was won by White Whale with 34 points. Carvel 16, Duffield 11, Smithfield 9, Manly 8, Rose Valley 7.

White Whale beat Carvel in the school baseball game. Special mention must be made of the girls playing for Carvel. The horse racing seemed to stir the blood of the onlookers and kept them asking for more.

The W.I. ladies looked after the refreshment booth; the ice cream and soft drinks stand was going strong all day; while a cry of dismay went up about 3 p.m. when it was discovered that the last nut fell at the Coconut Shy.

Duffield beat Stony Plain by a close score in a 7 inning senior ball game.

Duffield beat Keep Hills 1-0 in a soccer game. Lylal Akin and Miss Katie Schnell (White Whale S. D.) won the P. Faulks special prizes for pupils making the highest aggregate points.

Other prizes for special events were donated by McGavin's Ltd. J. Clements, The Duffield Trading Co., Duffield Service Station, J. J. Hellum.

C. W. Isen won the horse shoe contest, after an all day gruelling struggle.

The dance in the evening was well attended, and ended at midnight, when everyone was willing to call it the end of a perfect day.

Conference of Reformed Church Pastors.

A conference of Reformed Church pastors was held last week at Mewassin Church, the opening sermon being given by Rev. G. Gaiser, of Vegreville. Delegates were present from Winnipeg, Fort Saskatchewan and B.C.

Thursday Evg., address on Stewardship by Rev. Gaiser.

Friday Aft., Men's Conference; address by Rev. Schultz of Heintal; theme, The Layman's Work in the Church.

Friday Evg., address by Rev. G. A. Sauder; on Christian Education.

Saturday Evg., address by Student W. C. Bochnert of Winnipeg, Man.; theme, True Thankfulness.

Sunday Morning, address, to Sunday school by W. C. Bochnert. Sermon, Rev. G. Gaiser.

Sunday Aft., address by Rev. J. K. Smith of Canadian Bible Society.

All services well attended. Offerings for missions.

Spruce Grove News

Harvey Morrow has acquired a nifty Chevy Koupny.

Chief Contractor Foreman who had his big road camp two miles west of Stony, has moved his outfit down here and is working down to the Winterburn corner.

Winterburn Hall was filled to capacity Friday evening last, when the three-act play "The Country Boy Scout" was produced, under the auspices of Troop Six of the Edmonion Boy Scouts. The Grove's Troop, under Scout Master Gibson, was present in full force and enjoyed the play in a hearty manner.

"Beefsteak Charlie" returned to town Tuesday, after a trip out West.

A car owner from this district is appearing in an Edmonton police court today, charged with parking his car too near a street intersection in the City.

Bredo—Senger

A wedding took place on Tues. June 18 at Lutheran church, Spruce Grove, when Miss Mary (daughter of Mr. and Mrs. John Senger) became the bride of Mr. Wm. Bredo. Rev. Osterman, the pastor, performed the ceremony. After the ceremony, the bridal party, accompanied by their friends, repaired to the residence of the bride's, where a sumptuous repast was partaken of.

Lost, a Reward will be paid for the return of a Brown Club Bag containing clothes; lost between Stony Plain Garage and Guss Mintz Corner. Inquire Sun Office.

Ford

Do You Know?--

That no automobile except Ford selling for less than \$1500.00 has triplex shatterproof glass windshield as standard equipment?
That the new Ford Car has 25 ball and roller bearings in the chassis?
That when the new Ford is travelling at 50 miles per hour, the revolutions per minute of the motor is only 2077?
That the new Ford stands out supreme in its field in mechanical design, specifications, equipment, quality, and precision workmanship?

Car Load of Live Muskrats Take Long Trip

1—Freight car that carried the consignment. 2—Large cage on board S. S. Beaverford where the rats had more space and liberty. 3—Specimen of muskrat enjoying a carrot.

There were a thousand of them, all alive and hungry, shipped by Canadian Pacific Express Company from Oak Lake, Manitoba to Hamburg, Germany, via Canadian Pacific freighter Beaverford. Fluffy and friendly they went through the long trip away from their native marshes in good shape and were never so tired that they couldn't put away their carrot rations. It took fifty men several weeks to capture the requisite number without damage and by the use of special traps.

Two attendants in charge of the rodents were kept moving twelve hours a day each feeding and watering them. They travelled overland in specially constructed galvanized iron crates nested with wire and with an enclosed trough in each from which fresh water was available. On board the Beaverford, large cages were built as shown above in which the rats had more space to move around.

This shipment which was made recently, constitutes a record for movement of muskrat, or any other fur-bearing animal out of Canada overseas.
